

Fire Hazard Areas in the East Bay Hills

As a result of the Oakland Hills fire of 1991, the Bates Bill (337) was passed in 1992 requiring CAL FIRE to work with local governments to identify high fire hazard severity zones within local responsibility areas throughout each county in the state.

The City of Oakland requires property owners in this Very High Fire Hazard Severity Zone to maintain at least a 30-foot defensible space around structures on their property 365 days a year. All properties are inspected by the Fire Department for compliance on a continual basis throughout the year. www.oaklandnet.com/wildfireprevention
